DESIGNER HOOD

One Touch Cleaning

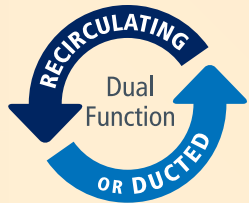

Dismantable Front Ducting Panel For Easy Cleaning

SMART SENSOR

Just WAVE to POWER ON /OFF and changing SPEEDS

Dual Function

The future of kitchen innovation is now here! Morgan's Powerful Revolution Smart Series Hood with GESTURE CONTROL & AUTO HEAT CLEANING redefines the way you cook, and clean-up after cooking. No more oily or wet hands touching function buttons. Just a convenient wave of the hand will do!

AUTO HEAT CLEANING

Morgan's innovative Auto Heat Cleaning Technology uses centrifugal force to heat up and dissolve oil residues in the air chamber and metal exhaust fan. Your kitchen hood stays clean for optimal performance.

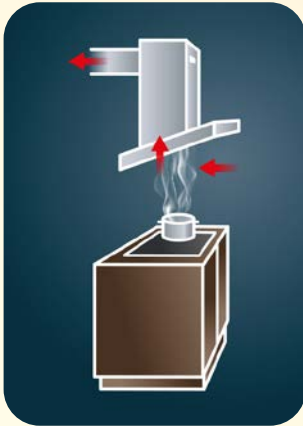

Heating Device Heats Up Oil

Oil Softens and is Dissolved

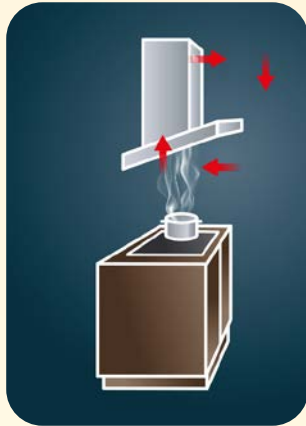

Oil Residues Flow Into Oil Cup

Ducted Ventilation

- Extracts odours up to 98%
- Extracts steam
- Requires ducting system

\* It is recommended to leave a window ajar when operating the ducting system.

Recirculated Ventilation

- Clean air filter eliminates cooking odours
- Easy installation – requires no ducting
- Requires separate recirculation kit

TO DUCT OR RECIRCULATE?

Your hood should preferably be ducted outdoors to ensure extracted air is directed outside for optimal performance. However, this could be impractical sometimes.

Fortunately, most Morgan hoods feature a recirculating mode to direct air through the metal filter where grease is removed, and subsequently, a carbon filter to eliminate odours before directing back into the kitchen.

Although that this method will reduce extraction rate compared with ducted extraction, and the carbon odour filter will need replacement.

BUILT-IN HOB

MORGAN OPTIFLEX series ensures powerful and heat concentrated flames with stable combustion to bring out the best flavours and cooking results. Just get its flexible cut-out dimensions to replace your old burner and experience the difference!

BUILT-IN OVEN

TRIPLE LAYER COOL DOOR SYSTEM

Innovative triple layer heat reflective coating:

- Keeps exterior oven door temperature cooler to the touch.
- Prevents burns when touching the oven door.
- Child-proof safety features.

ECO function saves energy in grilling mode. This method of cooking uses the top heating element, and is ideal for slow heating. The temperature rises slowly in oven heating so heat is fully penetrated into the food, reducing excessive energy and heat consumption.

INNOVATIVE CONVECTION SYSTEM

Morgan's innovative convection system delivers the ideal temperature and airflow. Enjoy different cooking styles made faster and more evenly with its different convection options.

BIGGER CAPACITY, SAVE ENERGY & TIME

Our 70L large oven gives more flexibility to cook larger quantities of food at once at your convenience.

CLASS A ENERGY EFFICIENCY

- For lower energy consumption & shorter cooking time.
- Conforms to worldwide energy efficiency standards.

BUILT-IN OVEN  
MBO-7680D

- Capacity: 70 Litres
- Power: 2300W
- Max temp: 250°C
- Electronic Control
- Oven Lamp: 1 x 25W
- With convection fan and Rotisserie
- 3-layer removable door with viewing window
- 24 hours digital timer with alarm
- With LED display
- Full black tempered glass
- 8 functions: Defrost, Top and bottom heating element, Rear heat with fan, Half Grill (top heating element), Full grill with rotisserie, Convection fan with Full grill, Convection fan with bottom heating element and Energy saving grilling mode.
- Standard accessories: 1 easy clean enamelled baking tray, 1 stainless steel oven rack, 1 rotisserie set, 1 set rack support
